

August 2017 –Loading and Timeout Errors (Chrome)

Chromebook Users – since some users cannot use an alternate browser (Firefox is recommended), we have provided the following workaround to allow for Flash. Please follow the below directions.

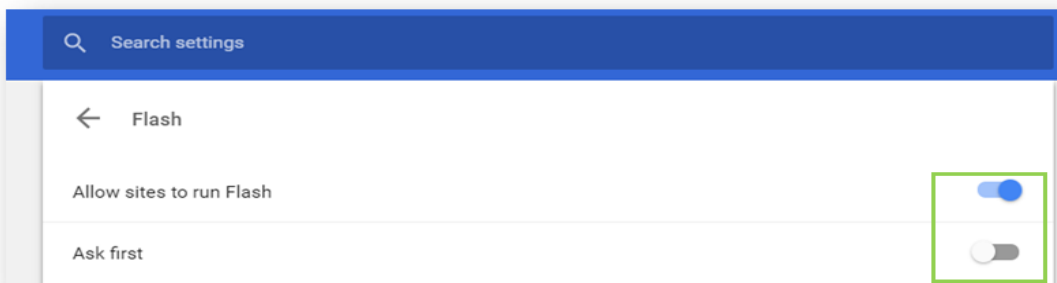

- 1) In the address bar, type `chrome://settings/content`

- 2) On the **Content settings** screen, find the Flash Player listing. Select the arrow.

- 3) Make sure *Allow sites to run Flash* is **ON**, and *Ask First* is set to **Off** (see below)

- 4) In the address bar, type `chrome://flags` as shown below

- 5) Scroll down to **Run all Flash content when Flash setting is set to “allow”** and make sure it is set to **Enabled**.

6) Click the **RELAUNCH NOW** button to relaunch Chrome. Flash content should now load properly.
