

## **MSC Online Learning Course Extension Request Policy**

The MSC Online Learning Program recognizes that students may encounter extraordinary circumstances that make it difficult to complete coursework within the time frame of a course term. In limited circumstances, such as severe illness, medical treatment, or other extenuating circumstances, counselors may request an extension for a student not to exceed two weeks. In order for an extension to be granted, 50% of the course must be completed. Extensions will not be granted during the last fourteen (14) days of a course.

### **Procedure**

- Must meet eligibility requirements outlined above.
- Counselors must request a course extension through the Program Director
- If requested, Counselors must provide documentation to support the extraordinary circumstances.
- If an extension is granted, it is the student's responsibility to complete all coursework prior to the end date of the course extension.
